About Akari Therapeutics Plc

Akari is a biopharmaceutical company focused on the development and commercialization of innovative therapeutics to treat orphan autoimmune and inflammatory diseases and, in particular, those where the complement system or leukotrienes or both complement and leukotrienes together play a primary role in disease progression. Akari's lead drug, Coversin is a C5 complement inhibitor, currently being evaluated in Paroxysmal Nocturnal Hemoglobinuria (PNH) and atypical Hemolytic Uremic Syndrome (aHUS). In addition to its C5 inhibitory activity, Coversin independently and specifically inhibits leukotriene B4 (LTB4) activity. Akari intends to evaluate Coversin in two conditions, the skin and eye diseases Bullous Pemphigoid and Atopic Keratoconjunctivitis, where the dual action of Coversin on both C5 and LTB4 may be beneficial. Akari is also developing other tick derived proteins, including long acting versions.
